

Final Project Presentation

[Project Title]

Team Members: [Names & Roll Numbers]

Program / Dept: [Program Name]

Mentor: [Mentor Name] **Batch:** [Year]

PRESENTATION AGENDA

01

Problem Statement

Defining the problem & its real-world relevance

02

Literature Review

Key background research & existing solutions

03

Methodology

Technical approach & architecture

04

Implementation

System demo & functional walkthrough

05

Testing & Validation

Results, metrics & QA

06

Innovation & Impact

What makes this unique & future scope

07

Conclusion

Summary, learnings & acknowledgements

01 | PROBLEM STATEMENT

CONTEXT

Describe the domain, sector, or real-world situation where the problem exists. Include scale, affected users, or industry relevance.

PROBLEM

State the specific gap, inefficiency, or unmet need that your project addresses. Be precise and measurable where possible.

OBJECTIVE

Define what your project sets out to achieve. Include scope, key outcomes expected, and success criteria.

02 | LITERATURE REVIEW & BACKGROUND

Existing Work & Key References

- Reference / Paper 1 — finding or technique used
- Reference / Paper 2 — finding or technique used
- Reference / Paper 3 — finding or technique used
- Reference / Paper 4 — finding or technique used

GAP IDENTIFIED

Describe what was missing in existing solutions and how your project fills that gap.

OUR APPROACH

Briefly state how your methodology differentiates from or improves upon prior work.

03 | METHODOLOGY & TECHNICAL APPROACH

TECH STACK & TOOLS

[List your languages, frameworks, libraries, platforms, APIs, cloud services, databases, etc.]

04 | IMPLEMENTATION PROGRESS & DEMO

[Screenshot / Demo GIF / Architecture Diagram]

KEY FEATURES IMPLEMENTED

- Feature / Module 1
- Feature / Module 2
- Feature / Module 3
- Feature / Module 4
- Feature / Module 5

05 | TESTING & VALIDATION

XX%

Accuracy / Precision

[Primary metric]

XX/XX

Test Cases Passed

[Unit / Integration]

XXms

Performance

[Avg response time]

Testing Type	Description / Coverage	Result
Unit Testing	Individual modules / functions tested	☒ Passed
Integration Testing	End-to-end workflow validation	☒ Passed
User Acceptance	[UAT feedback from test users]	[Status]
Edge Cases	[Boundary / error scenarios]	[Status]

06 | INNOVATION, CREATIVITY & FUTURE SCOPE

• WHAT MAKES THIS UNIQUE

- Novel approach or algorithm applied
- Creative integration of technologies
- Unique user experience or design thinking
- Efficiency/performance improvements achieved

FUTURE SCOPE & ENHANCEMENTS

- Planned feature / enhancement 1
- Scalability or deployment roadmap
- Potential for product / startup
- Open-source / publication potential

PRE-EVALUATION READINESS CHECKLIST

Project objectives are clearly defined

Working prototype / demo is ready

Final project report submitted to mentor

Plagiarism check completed (< 20%) — report attached

All mentor feedback incorporated

Source code & deliverables organized and prepared

Presentation slides prepared

All required milestones achieved

No academic integrity concerns

Participation satisfactory

Proof of deployment — HackerRank, LeetCode, GitHub attached

07 | CONCLUSION & LEARNINGS

PROJECT SUMMARY

[Write 2-3 sentences summarising what was built, the problem solved, and the results achieved.]

KEY LEARNINGS

- Technical skill / concept learned
- Soft skill / teamwork insight
- Industry-relevant practice gained

KEY OUTCOMES

- Outcome / achievement 1
- Outcome / achievement 2
- Outcome / achievement 3

Thank You!

Questions & Feedback Welcome
