

Shaik Imad Uddin

AI/ML Engineer · Full Stack Developer

Hyderabad, India · +91 7032866208 · shaikimaduddin10@gmail.com · github.com/Imad-81 · www.linkedin.com/in/shaikimad

EDUCATION

B.Tech, Artificial Intelligence & Machine Learning

2025 – 2029

Woxsen University, Hyderabad

CGPA: 8.41 / 10 Class XII: 87.6% Class X (CBSE): 90.2%

EXPERIENCE

Head of Technology · E-Cell, Woxsen University

May 2026 – Present

- **Own all technical operations for E-Cell**, managing internal tooling and the full technology stack used by the org.
- **Built the official E-Cell website from scratch** — sole architect and developer, from system design to deployment.
- **Enabling reliable tech infrastructure** to power events, startup initiatives, and day-to-day operations.

Machine Learning Intern · AI Research Centre, Woxsen University

May 2026 – Present

- **Building a predictive maintenance ML model** on a dataset of swimming pools across Europe to forecast per-facility maintenance windows before failures occur.
- **Working across the full pipeline** — data cleaning, feature engineering on pool usage and condition metrics, model training, and evaluation toward deployment-ready accuracy.

Full Stack AI Engineer Intern · Woxsen AI Research Centre

Apr 2026 – May 2026

- **Built the landing page for the Global South AI Summit**, an international AI conference — sole developer for design, development, and deployment.
- **Developed AI-powered full-stack apps** for research use cases, integrating ML models with modern frontend and backend stacks.
- **Collaborated with faculty and researchers** on applied AI projects, contributing to both engineering and research outcomes.

Co Tech Lead · Student Council, Woxsen University

Jan 2026 – Mar 2026

- **Built the 3D interactive website for Infinity**, Woxsen's flagship cultural fest — handling the entire frontend experience from concept to launch.
- **Collaborated with the student council** to deliver tech solutions supporting the university's largest student-run event.

PROJECTS

EduNex – AI Career Guidance Platform

sip-edunex.vercel.app

- **Architected a full-stack career intelligence platform** (Next.js 16, React 19, TypeScript, Convex, Clerk) serving students from Class 9 through postgraduate level with India-specific career data.
- **Built a deterministic Student Intelligence System (SIS)** that scores and ranks careers across subject alignment, interest fit, risk preference, accessibility, and market growth — LLMs explain the results but never change the rank.
- **Designed a two-stage LLM pipeline using Groq-hosted LLaMA**: an input model extracts structured profiles from MCQ responses; an output model generates personalized roadmaps and career explanations.

- **Shipped scholarship matching, olympiad discovery, and a real-time chat API** with eligibility-aware filtering, deadline alerts, and a Python scraper pipeline for live data ingestion into Convex.

ML-Based Crypto Trading Bot

github.com/Imad-81/TradingAlgorithm

- **Trained LSTM & XGBoost models** on historical OHLCV crypto data to generate predictive buy/sell signals.
- **Built a custom backtesting pipeline** with dataset balancing scripts to evaluate and iterate on strategy performance.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C, Java

AI / ML: Scikit-learn, TensorFlow, XGBoost, YOLOv8, LSTM

Web Dev: React, Next.js, Tailwind CSS, FastAPI

Tools: Git, Linux/WSL, Jupyter, LM Studio, Vercel

ACHIEVEMENTS & ACTIVITIES

- **National Hackathon – Udgham:** Reached the final rounds, competing against teams from across India.
- **Freelance Web Development:** Designed and delivered production websites for multiple local businesses.

INTERESTS

Artificial Intelligence · Software Development · Algorithmic Trading
